

AIM Industrial Solder Powder

Description

Solder powder is the key component to solder paste, representing nearly 90% of its mass. The quality of the powder will have a significant impact on the soldering performance, application qualities and storage properties of the solder paste. AIM Industrial solder powders are manufactured using state of the art equipment and processes resulting in the highest possible quality. Sphericity, oxide content, uniformity are all closely controlled and monitored to ensure consistent quality and repeatable results. AIM Industrial Solder Powders are the industries finest and can be tailored to a customer's specific application requirements.

- Distribution Equipment

- Oxide Content

- Alloy Analysis

Powder Characteristics

- Clear, Dry-Free Flowing Consistent Gray/Silver Color
- Lot-to-Lot Consistency High Purity Virgin Alloy
- Iver Color- Spherical ShapeAlloy- Solid, Void-Free
- Low Oxide - Satellite-Free

- Optical Auto Scanning Microscopy

- Gravimetric Analytical Techniques - Differential Scanning Calorimeter

- Distribution Availability in Standard IPC J-STD or Customer Specified

Testing and Equipment

- Powder Analytical Testing Equipment
- Precision Screen Classification
- Arc/Spark Emission Spectrometer
- XRF

Powder Inspected By Scanning Electron Microscope

- 10m JEC 5/2014 2.2700 5.04V LM 38M 1011.6mm 8:42:02
